December 2008 Monthly Program

SMUD Energy Efficiency

Panel Presentation by :

Steve Oliver

Savings by Design Program – a statewide non-residential energy efficiency program for commercial new construction

Mark Jagodzinski

SMUD incentive and rebate programs

Jim Barnett

Solar options for commercial customers

Points to take away from the program:

- SMUD has promotions and rebates to help customers save energy and money.
- Energy efficiency doesn't have to cost a lot.
- If you are thinking about embarking on an energy efficiency project, involve SMUD early.
- Retro-commissioning can help you improve your bottom line, saving commercial customers 5-20% on their energy bills.
- SMUD offers financial incentives to commercial and industrial customers who install and produce their own electricity with photovoltaic systems

Steve Oliver, P.E. - currently manages Savings By Design, a statewide nonresidential energy efficiency program for commercial new construction. He has also served SMUD customers in the retrofit energy efficiency program by providing lighting, HVAC and process improvement recommendations. Prior experience includes the application and sale of process equipment into the chemical, process and industrial marketplace.

Mark Jagodzinski - Manages SMUD's Commercial and Industrial Retro-commissioning Programs. He has 17 years of energy efficiency program experience with residential, commercial and manufacturing accounts. He is a graduate of Naval Nuclear Power School, holds a Certificate in Heating, Ventilation and Air Conditioning/Refrigeration through the American Society of Heating, Refrigeration, and Air Conditioning Engineers, a Certificate in Project Management through UC Davis, and is a Certified Energy Manager.

Jim Barnett - Holds the position of Principal Architect at SMUD and is a LEED Accredited Professional. He currently manages the photovoltaic programs, the support PV installation on customer's facilities. He has over 30 years of experience in sustainable design in both the commercial and residential sectors.
