April 2009 Monthly Program

Program Sponsor:

Managing Sustainable Change

Continuing Education Units Approved

Every Facility Manager considering a sustainability initiative needs to be familiar with and comfortable making changes in many areas. This presentation will describe several change management frameworks for achieving success in a challenging environment. The FM must achieve a good understanding of the environmental factors of change, and the needed changes in people, processes, systems and sometimes attitudes that contribute to achieving sustainability goals.

Learning Objectives:

- Understanding how Facility Managers perceive change
- Using frameworks for managing change
- Describing the role of a change agent
- Creating useful change in a sustainable environment

Presented by:

Kit Tuveson, CFM, IFMA Fellow

Kit Tuveson is President of Tuveson & Associates, LLC, a Facility Management consultancy company. His 36-year Hewlett-Packard career included responsible positions in Process Engineering, Manufacturing Line Management, Facilities Management and Environmental Health & Safety. He has managed facilities teams, global program managers, cross functional teams, and served as Global Director Facility Management Operations and also Global Director of Environmental Health & Safety.

Mike Dowd, CFM

Mike Dowd has been in facilities management at Intel for 20 years. His responsibilities have included construction project management, facilities planning, manager of California facilities planning, manager of Folsom Workplace Services, and Program Management of several facilities upgrades including Intel's world headquarters in Santa Clara. Mike is currently a program manager for the Corporate Services division focusing on developing and implementing new global workplace design standards.
