**“Heat & Power Solution”**

Presenter: **Vito Coletto**

Vito Coletto from United Technologies Company will introduce you to the fuel cell as it relates to the FM environment.

Find out about the clean, efficient, reliable and durable solution to power, heat and cooling for commercial installations.

Fuel cell installations have accumulated over 1 billion kilowatt hours of operational experience since 2006. Fuel cell technology has been installed in 19 countries on 5 continents. Applications include schools, hospitals, hotels, data centers, high-rise office buildings, military installations, and manufacturing sites. Grid-connect or Grid-independent, your power stays on even when the grid goes down. Assured power along with Environmental benefits make fuel cells are one of the cleanest power generating technologies available today.

Please join us to learn more about powering the future.
