**IFMA PROGRAM November 2007**

**Implementing Audio Visual  
Systems in a  
"GREEN WORLD"**

Presented by:

*Clint Childress, LEED AP, Draper Inc.*  
*Matt Dariano, CTS, Anderson Audio Visual*  
*John Neal, CTS-D, Anderson Audio Visual*

Most of us have either heard of it or have experienced it first hand. You are finishing up construction on your Tenant Improvement project or on your New Building, and then you get "THE CALL" from your Executive saying, "I saw this cool plasma thingy and A/V system at a meeting yesterday and I want that in my new Boardroom!"...And now you have to scramble to squeeze this in while maintaining your construction schedule, and oh yeah, you now have to tear open the walls, saw cut the floors, modify your new Boardroom table, add more electrical, move the beautiful pendant lights you just put into the ceiling, etc., all to accommodate this Exec's AV system!

This presentation will cover audio visual design and infrastructure considerations to help ease/eliminate the abovementioned scenario. We will also provide an update on emerging AV trends and technologies, as well as discuss what the Audio Visual Industry is doing to address LEED and "Green" issues.

We will be giving away a pair of Polycom Skype conference phones (\$299 value) at the end of the program to one lucky winner. *(You must be present to win)*
